Russian Motor Vehicles Maurice A. Kelly 2011-04-15 A book concerning Russian limousines, and the Chinese models that were initially derived from them, has never been attempted before. This book investigates the whole story of why the Soviet Communist Party required such a bourgeois product, and how production was subsequently achieved. Following the orders of Stalin, work on the limousines commenced during the first Five Year Plan (1927-1933) at the Putilov Works, late the Kirov Zavod, where the Leningrad L-1 was made in a limited number. From these beginnings, the Moscow and Gorky models emerged, and later the Chinese-derived types made with Russian aid during the late 1950s. Covering all of these models, up to the last one produced in 2003, and featuring full specifications translated from the relevant primary sources in Russian and Chinese literature, this is a meticulous and unique account of a previously neglected subject.

Fiat 131 Abarth Graham Robson 2008-12-15 When Fiat entered rallying in 1970, its ultimate aim was to become World Rally Champion and the 131 Abarth of 1976-1980 provided the machinery to make that possible. It started winning World rallies within months of being launched, and in 1977, 1978 and 1980 the ‘works’ team also won the World Championship for Makes, and set every standard by which Rally Giants were to be judged. Was there ever any doubt that successors like the Lancia Rally 037 and the Delta Integrale would eventually come from the same stable?
