**Evil by Design** Chris Nodder 2013-06-05 How to make customers feel good about doing what you want Learn how companies make us feel good about doing what they want. Approaching persuasive design from the dark side, this book melds psychology, marketing, and design concepts to show

why we're susceptible to certain persuasive techniques. Packed with examples from every nook and cranny of the web, it provides easily digestible and applicable patterns for putting these design techniques to work. Organized by the seven deadly sins, it includes: Pride — use social proof to position your product in line with your visitors' values

Sloth — build a path of least resistance that leads users where you want them to go  
Gluttony — escalate customers' commitment and use loss aversion to keep them there  
Anger — understand the power of metaphysical arguments and anonymity  
Envy — create a culture of status around your product and feed aspirational desires  
Lust — turn desire into commitment by using emotion to defeat rational behavior  
Greed — keep customers engaged by reinforcing the behaviors you desire  
Now you too can leverage human fallibility to create powerful persuasive interfaces that people will love to use — but will you use your new knowledge for good or evil? Learn more on the companion website, [evilbydesign.info](http://evilbydesign.info).

*The Economics and Politics of Oil in the Caspian Basin*

Boris Najman 2007-09-12 The Caspian Basin region has boomed since the late 1990s due to new oil discoveries, new pipelines that have diversified countries' transport options and world oil prices that have risen from below \$10 in 1998 to \$70 in 2006. This book analyzes the experience of the Caspian countries during the oil boom. It is founded on empirical studies, using either macroeconomic tools or an analysis of public budgets, or microeconomic analysis of household survey data or fieldwork in oil-producing regions. Moving from aggregated to disaggregated analysis and, in-keeping with its emphasis

on rigorous empirical analysis to the greatest extent possible, several chapters are written by specialists on the Caspian region. Whilst there is an emphasis on the economic consequences of the oil boom, the interdisciplinary aspects of the phenomenon are also recognized. Overall, the analysis is firmly rooted in the region, yet the empirical studies also provide a basis for drawing broader lessons about the effects of an oil boom.

haar buiten gewone talent de slechte bedoelingen van de heren aan het licht te brengen. Maar zo serieus als ze zich inzet voor het huwelijksgeluk van anderen, zo weinig aandacht heeft ze voor dat van zichzelf.

Liefde? Nee, dat is niet voor haar weggelegd... James Glossup moet trouwen om aan de voorwaarden van het testament van zijn tante te voldoen, die alleen een getrouwd heer voor de bewoners van haar landgoed laat zorgen.

Wanneer Henrietta zijn plannen dwarsboomt, is hij woedend en eist hij dat ze voor een geschikte bruid zorgt. Vol overgave stort ze zich op het vinden van de juiste kandidaat - een kandidaat die veel dichterbij is dan ze denkt. Want hoelang kan ze de hevige aantrekkingskracht tussen hen blijven ontkennen?

The Sailing Mind Roberto Casati 2022-06-01 This book scrutinizes the practice of sailing and its relation to philosophy of mind. Sailing brings about a peculiar human-artifact interaction which can lead to unexplored research paths. The idea behind this collection is that this interaction is better scrutinized by sailor scientists/philosophers to open up new possible pathways in research.

Fascinating theoretical breakthroughs have been provided by observing sailing practices with the most well-known being Hutchins' introduction in cognitive science of the concept of "distributed cognition." However, in times past, sailing has both fueled philosophical metaphors, from Theseus' ship to Plato's image of the intellect as the boatperson of the soul, and inspired philosophers' views (as happened to Herder during a stormy sea trip). The ecology of sailing is highly constrained: sailboats move at the surface between a compressible fluid and an incompressible fluid. Wind originates in certain specific circumstances. Only certain sequences of actions are possible to take advantage

of this ecology. The ontology of sailing is both of the boat and of the ocean/wind system. It highlights the fact that sailboats have been for centuries arguably the most complex technological artifacts in each culture that developed them, precisely because the environment they are engaging is so peculiar and demanding - almost the precise dual of Sapiens' adaptive environment. This volume will appeal to philosophers of mind, cognitive psychologists, and marine professionals.
