**Surgical Oncology Manual** Frances C. Wright 2020-08-27 This third edition manual provides a comprehensive, insightful, evidenced-based review of general surgical oncology and serves as a valuable resource for general surgeons in training, practicing general surgeons, and surgical oncologists. The volume describes a multidisciplinary approach that integrates clinical, radiologic, and pathologic data in formulating practical clinical management, and offers a practical approach to the most common situations when treating cancer patients. Each chapter focuses on an individual malignancy and describes the presentation of the malignancy, integrated management based on stage, landmark trials, and suggestions for who to discuss at multidisciplinary cancer conferences. Multiple tables in each chapter provide a concise yet comprehensive summary of the current status of the field. Clinical “pearls” or tips and tricks from high volume surgeons at the University of Toronto are also discussed. The third edition of the Surgical Oncology Manual will serve as a critical resource for general surgeons in training and practicing surgeons dealing with this challenging field.

**International Manual of Oncology-Practice** Ramon Andrade De Mello 2019-10-15 Cancer is a very aggressive disease and currently it has been considered a challenge to oncologists and cancer patients worldwide. Nowadays, several therapeutic strategies had improved toward last decades. Surgery is many times still the best curative treatment, mainly in early stage disease. However, Radiotherapy and chemotherapy acquired a main role in this scenario. Target therapies were introduced for medical oncology practice and are demonstrating a hallmark of a new era in cancer treatment. More recently, immunotherapy has been considered the novel cornerstone in cancer treatment. The 2nd edition of the International Manual of Oncology Practice (iMOP) emerged after the great success of the iMOP 1st edition as a reference for medical oncologists and medical residents in the field. In this edition, several chapters were revised and its addresses from the molecular issues of cancer sciences to the clinical practice in medical oncology. In addition, multiple choice questions and clinical cases were included in the main chapters in order to improve the reader learning. The book focuses systemic treatments in many areas of medical oncology, such as breast cancer, gastrointestinal, thoracic, urological oncology, head and neck tumors, bone tumors, sarcomas and palliative care. The topics herein discussed will provide the readers a step forward in the medical oncology practice understanding and give facilities for help in cancer patient treatments.
