**Canon 5D Mark III Essential Training** 2012 In this course, photographer and author Ben Long details the features, controls, and options in the Canon 5D Mark III digital SLR. The course begins with an overview of what a digital SLR is and takes a tour of the basic camera components. Ben then discusses the basic camera operation: changing lenses, navigating the menus, shooting in automatic mode, reviewing and managing photos on the LCD screen, and transferring photos to a computer. Next, the course introduces more advanced exposure options: program mode, exposure compensation, ISO adjustments, and more. After Ben briefly defines each option, he shows how to adjust it using the camera controls. Ben also discusses white balance options, advanced metering and autofocus controls, flash, live view, and video shooting. The course ends with a

chapter on maintenance, including sensor- and camera-cleaning and care tips.

*Photographing Families* 2016-04-12 Traditional portrait photographers, for centuries, have relied upon lighting and posing conventions that

were largely based on the aesthetic ideals set forth by Master painters and sculptors. The results of their rigid approach to depicting the family resulted in a cookie-cutter look to portraiture. The subjects were beautifully lit, stiffly posed, and, well, proper. The resulting image presented a likeness of each family member but did not speak to the inner lives of the subjects. Today, portraiture has changed along with the modern family. Families want portraits that make a statement—an image that tells viewers a story about the subjects who have gathered together in front of the camera. These portraits have a looser, “lifestyle” feel and are made, as they have traditionally been, inside of a photographic studio. Today, however, these portraits are also often captured in the family home, at an outdoor location—whether at the beach or in the heart of the city, or some other location that has personal meaning to the family. In this book, Elizabeth and Trey present 60 of their favorite and most diverse family portraits, showing you the art and technique of creating highly salable portraits. With every captivating image, you’ll learn how the Homans masterfully orchestrated the technical and artistic aspects of the portrait, from the location or backdrop selection, to the overall compositional qualities, to the arrangement of the group in the scene, to the individual poses. You’ll also learn the strategies Elizabeth and Trey used to create natural poses that contribute to the feel of the portrait and will learn how the lighting (studio light, existing light, and natural light) was harnessed to create a polished, professional portrait. Perhaps one of the big challenges of photographing families is that no family grouping or family dynamic is the same. This

book will arm you with the tools you need to work with the smallest to largest groupings, including a wide range of subjects, from newborns to the elderly.

**Photographing Families** 2016-04-12  
Traditional portrait photographers, for centuries, have relied upon lighting and posing conventions that were largely based on the aesthetic ideals set forth by Master painters and sculptors. The results of their rigid approach to depicting the family resulted in a cookie-cutter look to portraiture. The subjects were beautifully lit, stiffly posed, and, well, proper. The resulting image presented a likeness of each family member but did not speak to the inner lives of the subjects. Today, portraiture has changed along with the modern family. Families want portraits that make a statement—an image that tells viewers a story about the subjects who have gathered together in front of the camera. These portraits have a looser, “lifestyle” feel and are made, as they have traditionally been, inside of a photographic studio. Today, however, these portraits are also often captured in the family home, at an outdoor location—whether at the beach or in the heart of the city, or some other location that has personal meaning to the family. In this book, Elizabeth and Trey present 60 of their favorite and most diverse family portraits, showing you the art and technique of creating highly salable portraits. With every captivating image, you'll learn how the Homans masterfully orchestrated the technical and artistic aspects of the portrait, from the location or backdrop selection, to the overall compositional qualities, to the arrangement of the group in the scene, to the individual poses.

You'll also learn the strategies Elizabeth and Trey used to create natural poses that contribute to the feel of the portrait and will learn how the lighting (studio light, existing light, and natural light) was harnessed to create a polished, professional portrait. Perhaps one of the big challenges of photographing families is that no family grouping or family dynamic is the same. This book will arm you with the tools you need to work with the smallest to largest groupings, including a wide range of subjects, from newborns to the elderly.

**Portraiture Unplugged** Carl Caylor  
2015-06-22 Good lighting is everything in portraiture. The right light sculpts our subjects, smooths the skin, evens skin tones, and helps create the feeling of a third dimension in a two-dimensional image. The gold standard of lighting has, for the better part of a century, been produced by artificial lights (hot lights or strobes) in the studio. These sources allow for precise lighting effects on demand. However, artificial light cannot match the beauty or ambience that gorgeous natural light creates—and studio lighting can break the bank. In part 1 of this book, Carl Caylor introduces readers to a failproof method for understanding, shaping, and harnessing natural light for dazzling results that rival studio-lighting looks. Using your powers of observation, an understanding of the physics of light, and employing a couple of inexpensive tools (reflector panels to bounce light and a gobo to block light), Caylor shows you how to make the most of the sunlight for indoor and outdoor location shoots—and even studio work. You'll learn how to tweak the direction of light and manipulate lighting angles to re-create classic portrait lighting styles—short

lighting, broad lighting, Rembrandt lighting, and more—that flatter and contour your subjects’ facial structures to make them look their very best. In part 2 of the book, Carl provides an in-depth analysis into the techniques he used to create 60 beautiful natural-light portraits in myriad locations and circumstances, producing a wide range of portrait looks. Readers will learn how to integrate other elements that are important to building an

effective portrait—including prop selection, wardrobe, composition, expression, posing, and even planning for a top-notch, contrasty black & white shot. The text in this book, along with inspirational images, will coax many readers to enjoy a “back to basics” approach that will allow them to produce technically exquisite and profoundly artful, flattering portraits that will sell themselves to clients every time.
