An Eames Anthology Charles Eames 2015-04-28

An Eames Anthology collects for the first time the writings of the esteemed American architects and designers Charles and Ray Eames, illuminating their marriage and professional partnership of fifty years. More than 120 primary-source documents and 200 illustrations highlight iconic projects such as the Case Study Houses and the molded plywood chair, as well as their work for major corporations as both designers (Herman Miller,

Vitra) and consultants (IBM, Polaroid). Previously unpublished materials appear alongside published writings by and about the Eameses and their work, lending new insight into their creative process. Correspondence with such luminaries as Richard Neutra and Eero Saarinen provides a personal glimpse into the advance of modernity in mid-century America.

[God as Creator in Acts 17:24](#) Jennifer Marie

Creamer 2017-08-25 The Areopagus speech of Acts provides a helpful study of how Paul both engaged and confronted the contemporary culture of his day to present the message of Christianity

to his hearers in Athens. How does Paul, as a Jew, contextualize the message for his audience of Stoic and Epicurean philosophers in Athens on the topic of God as Creator in Acts 17:24? Paul touches on a subject of contentious debate between Stoics and Epicureans when he identifies God as Creator. Stoics believed in a creating deity, something akin to Plato's demiurge of the Timaeus. Epicureans ridiculed such an idea. By using the identification of God as Creator, Paul engages a common controversy between schools of philosophy.

Inside the Fisher Body Craftsman's Guild John

L. Jacobus 2011-12-01 From 1930 to 1968, General Motors sponsored a 1:12 scale model automobile design competition for youth—the famous Fisher Body Craftsman's Guild. Each year thousands of boys and young men from across America competed for scholarships by designing, building, and submitting a scale model of their own “dream car,” to be judged on such qualities as design originality and craftsmanship. A public relations bonanza for GM, the program helped to identify and nurture a generation of future leaders in design engineering, automotive design, automotive styling, industrial design and

other endeavors. In these essays, more than 30 Guildsmen chronicle their experiences in the competition, revealing their model car design techniques, tricks, and secrets: Philip J. Rauth, Joseph R. Rauth, Herman I. Rauth, Roger D. Teter, Gordon D. Williams, William A. Keyser, Jr., Warren M. Bakken, Wilfred C. Keagy, Arnold L. Joslin, Raymond P. Wykes, Charles R. Foreman, Adrian A. Bruno, Charles H. Stewart, George E. Anderson, William D. Scott, Walter F. O'Neill, Jr., Thomas L. De Fazio, Felix R. Collazo, Ronald J. Will, Roger L. Schneider, Thomas L. Covert, Paul F. Bonfilio, George G. Herzog, Samuel T.

Kjellman, Frederick J. "Bud" Magaldi, Geza A. Loczi, Jeffrey A. Jones, Robert W. Lawhn, Tom W. Graboski, Terry P. Graboski, Spencer L. Mackay, Grant Onnie, John L. Jacobus and John M. Mellberg.

Language in the Media Sally Johnson 2018-10-18
Examining the ways in which the media represents language-related issues and how it shapes and constructs what people think language is, this book offers a multilingual survey of the construction of language in and by the media. Tackling the big issues of identity, gender, youth, citizenship, politics and ideology across a

range of mediums including television, radio, newspapers, magazines and the internet, *Language in the Media* brings together an international team of experts to examine how the media gives language distinctive forms and values. This is an essential text for students and researchers of sociolinguistics or language and communication. At a time when trust in the mainstream media is at an all-time low and world leaders are using new media to deride so called 'fake news', this classic text offers insight and critical analysis into the key issues surrounding the relationship between language, the media and

its audience.

On Language and Sexual Politics Deborah Cameron 2012-12-06 This collection of articles presents a selection of Deborah Cameron's work on language, gender and sex in one single volume. Arranged thematically, this book covers major developments in Anglo-American feminist linguistics, and Cameron's responses to these, spanning the last twenty years. The collection's overarching theme is the political relationship between language and gender: four distinctly themed sections demonstrate that a variety of forces affect gender relations, and gender

representations, in different times and places. Cameron examines the connections between language and the (mis)representation of reality, and the role language plays in reproducing gender inequalities. More recent articles focus on representations of men and women as communicators, as well as the impact of sexuality on gender and gender relations, an increasingly prominent area of the author's research. This timely study brings much of Cameron's work together for the first time, and highlights characteristics of her work with which many readers will be familiar: a combination of linguistic

and feminist political orientation; and a distinct focus on conflict in gender relations. Including a new introductory essay and eleven articles, three of which are previously unpublished, with short introductions to contextualize each piece, the collection is extremely useful for students and teachers on a variety of courses including English language and linguistics, women's studies, gender studies and communication studies.

A Modest Proposal in the Context of Swift's Irish

Tracts Maria-Angeles Ruiz Moneva 2020-06-12

Swift's *A Modest Proposal* has always aroused the interest not just of literary critics, but also of linguists and pragmatists. Within the latter approaches, the study of irony, and more concretely, the intentions and attitudes that must have guided the production of such an intricate work, have always been paramount. However, it seems that within pragmatics the analysis has been restricted so far to the 1729 work itself. In the present author's view, it is interesting to

contextualise this masterpiece of irony and satire within Swift's wider writing on Ireland, an approach that remains to be carried out. Accordingly, this work sets out to analyse a selection of Swift's Irish Tracts, with a view to tracing the evolution within Swift's literary production of his views and attitudes towards the situation of his homeland. Although different pragmatic approaches are applied, the emphasis is laid upon the contributions that the relevance-theoretical framework and its studies on irony may bring to the understanding of this particular Tract. The works selected are meant to cover and

also be representative of the main phases currently distinguished within Swift's writing on the "Irish Question". It is therefore hoped that a deeper analysis of the former works by Swift on this topic will provide new insights for a better understanding of A Modest Proposal.

The Fisher Body Craftsman's Guild John L. Jacobus 2013-07-01 The Fisher Body Craftsman's Guild was a national auto design competition sponsored by the Fisher Body Division of General Motors. This competition was for teenagers to compete for college scholarships by designing and building scale model "dream" cars. Held from the 1930s through the 1960s, it helped identify and nurture a whole generation of designers and design executives. Virgil M. Exner, Jr., Charles M. Jordan, Robert W. Henderson, Robert A. Cadaret, Richard Arbib, Elia 'Russ' Russinoff, Galen Wickersham, Ronald C. Hill,

Edward F. Taylor, George R. Chartier, Charles W. Pelly, Gary Graham, Charles A. Gibilterra, E. Arthur Russell, William A. Moore, Terry R. Henline, Paul Tatseos, Allen T. Weideman, Kenneth J. Dowd, Stuart Shuster, John M. Mellberg, Harry E. Schoepf, and Ronald J. Will, are among those designers and design executives who participated in the Guild. The book also describes many aspects of the miniature model Napoleonic Coach and other scale model cars the students designed. **Popular Mechanics** 1982-02 Popular Mechanics inspires, instructs and influences readers to help

Computation of Language Roland Hausser

2012-12-06 The study of linguistics has been forever changed by the advent of the computer. Not only does the machine permit the processing of enormous quantities of text thereby securing a better empirical foundation for conclusions-but also, since it is a modelling device, the machine allows the implementation of theories of grammar and other kinds of language processing. Models can have very unexpected properties both good

and bad-and it is only through extensive tests that the value of a model can be properly assessed. The computer revolution has been going on for many years, and its importance for linguistics was recognized early on, but the more recent spread of personal workstations has made it a reality that can no longer be ignored by anyone in the subject. The present essay, in particular, could never have been written without the aid of the computer. I know personally from conversations and consultations with the author over many months how the book has changed. If he did not have at his command a powerful typesetting

program, he would not have been able to see how his writing looked and exactly how it had to be revised and amplified. Even more significant for the evolution of the linguistic theory is the easy testing of examples made possible by the implementation of the parser and the computer-held lexicon. Indeed, the rule set and lexicon grew substantially after the successes of the early implementations created the desire to incorporate more linguistic phenomena.

Professionalism, Pragmatism, Pride, Sandro

Mancuso offers a better and more fulfilling path. If you want to develop software with pride and professionalism; love what you do and do it with excellence; and build a career with autonomy, mastery, and purpose, it starts with the recognition that you are a craftsman. Once you embrace this powerful mindset, you can achieve unprecedented levels of technical excellence and customer satisfaction. Mancuso helped found the world's largest organization of software craftsmen; now, he shares what he's learned through inspiring examples and pragmatic advice you can use in your company, your projects, and

your career. You will learn Why agile processes aren't enough and why craftsmanship is crucial to making them work How craftsmanship helps you build software right and helps clients in ways that go beyond code How and when to say "No" and how to provide creative alternatives when you do Why bad code happens to good developers and how to stop creating and justifying it How to make working with legacy code less painful and more productive How to be pragmatic—not dogmatic—about your practices and tools How to lead software craftsmen and attract them to your organization What to avoid when advertising

positions, interviewing candidates, and hiring developers How developers and their managers can create a true culture of learning How to drive true technical change and overcome deep patterns of skepticism Sandro Mancuso has coded for startups, software houses, product companies, international consultancies, and investment banks. In October 2013, he cofounded Codurance, a consultancy based on Software Craftsmanship principles and values. His involvement with Software Craftsmanship began in 2010, when he founded the London Software Craftsmanship Community (LSCC), now the

world's largest and most active Software Craftsmanship community, with more than two thousand craftsmen. For the past four years, he has inspired and helped developers to organize Software Craftsmanship communities throughout Europe, the United States, and the rest of the world.

Wisdom from the Late Bronze Age Yoram Cohen
2013-09-25 This volume presents the original texts and annotated translations of a collection of Mesopotamian wisdom compositions and related texts of the Late Bronze Age (ca. 1500–1200 B.C.E.) found at the ancient Near Eastern sites of

Hattuša, Emar, and Ugarit. These wisdom compositions constitute the missing link between the great Sumerian wisdom corpus and early Akkadian wisdom literature of the Old Babylonian period, on the one hand, and the wisdom compositions of the first millennium B.C.E., on the other. Included here are works such as the Ballad of Early Rulers, Hear the Advice, and The Date-Palm and the Tamarisk, as well as proverb collections from Ugarit and Hattuša. A detailed introduction provides an assessment of the place of wisdom literature in the ancient curriculum and library collections.

Foundations of Pragmatics Wolfram Bublitz

2011-06-30 Open publication Opening the 9-volume-series Handbooks of Pragmatics, this handbook provides a comprehensive overview of the foundations of pragmatics. It covers the central theories and approaches as well as key concepts and topics characteristic of mainstream

pragmatics, i.e. the traditional and most widespread approach to the ways and means of using language in authentic social contexts. The in-depth articles provide reliable orientational overviews useful to researchers, students, and teachers. They are both state of the art reviews of their topics and critical evaluations in the light of subsequent developments. Topics are thus considered within their scholarly context and also critically evaluated from current perspectives. The five major sections of the handbook are dedicated to the Conceptual and Theoretical Foundations (with a historiographic overview of the

establishment and subsequent development of pragmatics), Key Topics (investigating indexicality, reference and other concepts that were the first to make their way from grammar into pragmatics and mainstream notions like speech acts, types of inference), the Place of Pragmatics in the Description of Discourse (delimiting pragmatics from grammar, semantics, prosody, literary criticism), and Methods and Tools.
