Leica M Compendium Jonathan Eastland 1994 The Leica M system has been with us since 1954. It rapidly became, and has remained the favorite instrument of photographers, especially photojournalists, who, like Henri Cartier-Bresson, seek to "catch life in the act", to record "the decisive moment". In this Leica M Compendium Jonathan Eastland describes the whole Leica M system from his experience as a professional photographer. He explains how to use, enjoy and get the best out of the cameras and lenses, regardless of age. The latest lenses can be used on the earliest cameras, and vice-versa, and the Visoflex, although no longer made, is now much easier to use with the M6 and its TTL metering. Advice on planning and shooting a story with the Leica and extensive tables of technical data complete this ideal companion for the practical Leica M photographer, as well as for the Leica collector and enthusiast.

Leica Accessory Guide Dennis Laney 1996 This book is used in conjunction with The Leica Pocket Book and Leica Price Guide and has been compiled from original Leitz sources. The book has two aims: the first is to act as the constant pocket companion for the Leica Collector in his travels; the second is to help Leica enthusiasts who want to study fascinating accessories in greater depth. It covers the whole period from 1924 to Spring 1996 and will enable the reader to place an individual accessory in its historical context with contemporary Leica models and lenses. Readers wishing to study Leica accessories further and looking for a more suitable bedside companion are referred to the author's Leica Collectors Guide which also includes comprehensive accounts of Leitz enlargers, projectors and binoculars.
