Modern Thermodynamics for Chemists and Biochemists Dennis Sherwood 2018-05-11 Thermodynamics is fundamental to university and college curricula in chemistry, physics, engineering and many life sciences around the world.

It is also notoriously difficult for students to understand, learn and apply. What makes this book different, and special, is the clarity of the text. The writing style is fluid, natural and lucid, and everything is explained in a logical and transparent manner. Thermodynamics is a deep, and important, branch of science, and this book does not make it "easy". But it does make it intelligible. This book introduces a new, 'Fourth Law' of Thermodynamics' based on the notion of Gibbs free energy, which underpins almost every application of thermodynamics and which the authors claim is worthy of recognition as a 'law'. The last four chapters bring thermodynamics into the twenty-first century, dealing with bioenergetics (how living systems capture and use free energy), macromolecule assembly (how proteins fold), and macromolecular aggregation (how, for example, virus capsids assemble). This is of great current relevance to students of biochemistry, biochemical engineering and pharmacy, and is covered in very few other texts on thermodynamics. The book also contains many novel and effective examples, such as the explanation of why friction is irreversible, the proof of the depression of the freezing point, and the explanation of the biochemical standard state.

Born to Create Theresa Dedmon 2012-04-17 Creatively Supernatural! Offering a launching pad for you to burst into the realm of creative expression—that fun, fantasy world where the Creator is waiting to welcome you. There is a connection between creativity, your identity, the Church, and the world—and it is an important connection. Creativity is tied to all believers' identity, all who are made in the image of the Creator, all who are born to create!

Overflowing with many thrilling, modern-day testimonies, Born to Create emphasizes the magnitude of both craft—practice and excellence—as well as anointing. Many who have been freed to embrace their creative ideas and passions, whether in the art fields, business, or education, share their amazing stories with you. Their freedom allowed them to powerfully release healing, the prophetic, and the knowledge of God's love into the marketplace. Live creatively, friends. If someone falls into sin, forgivingly restore him, saving your critical comments for yourself. You might be needing forgiveness before the day's out. Stoop down and reach out to those who are oppressed. Share their burdens, and so complete Christ's law... (Galatians 6:1 The Message). You will learn how the supernatural can be activated through what you create, and you will explore hindrances from understanding your creative destiny—your true identity.
