AN INTERNATIONAL PERSPECTIVE ON ECONOMIC EDUCATION William B. WALSTAD 2012-12-06 Economics is taught in some form in the secondary schools of nations throughout the world. The subject is rarely taught in elementary schools, and while economics courses are offered in universities, the majority of students end their formal education with secondary school. Thus, the best opportunity for the economic education of the youth of a nation occurs in secondary schools. This book examines economic education at this critical level of the educational system. The teaching of economics in secondary schools varies across countries. These differences occur because of history, the structure of education, and other national factors. At the same time, there are common elements in the economic education of many countries, especially in content coverage. This contrast between the common features and the uniqueness of economic education in secondary schools of major industrial nations exemplifies the international perspective presented in this book. The international perspective is developed in the six sections of the volume. The first section discusses why nations should include economics in school curricula, and presents a framework for teaching economics that should have global appeal. Dissension and consensus on economic issues among North American and European economists are examined in the second section. The third section surveys the U.S. research literature on precollege economic education and assesses the current state of economics instruction in U.S. schools. The economics curricula and educational practices in seven other nations -- the U.K., Canada, Japan, Germany, Austria, Korea, and Australia -- are described in the fourth and fifth sections. The fifth section also presents international comparisons of economic understanding based on national testing in six of those nations. The sixth and final section explores the role of economic education in centrally planned economies, and its effects on the transition to a market economy, using Russia, Bulgaria, and China as case studies.

ORGANISATIONAL CHANGE: DEVELOPMENT AND TRANSFORMATION Dianne Waddell 2019-08-01 Change management is a crucial process for gaining the competitive advantage that is the goal of many organisations. Leaders and change agents are often faced with conflicting challenges of motivating and understanding increasingly diverse workforces, accounting to stakeholders and planning for the future in a chaotic environment. **ORGANISATION CHANGE: DEVELOPMENT AND TRANSFORMATION, 7e** takes both an organisational development and transformational approach to change, to reflect the environment of change faced by organisations today. With the field of organisational change continuing to evolve, especially in an international context, future directions of change management are also discussed. To emphasise the relationship between theory to practice, this text provides 10 local and international case studies, practitioner vignettes and a suite of online cases supported by a case matrix.

THE ALLIED OCCUPATION AND JAPAN'S ECONOMIC MIRACLE Bowen Causey Dees 1997 There is a substantial body of literature dealing with the Occupation of Japan; yet hardly any of it has addressed the significance of the considerable contributions in science and technology to Japan's startling economic progress - contributions made possible in large measure by the Scientific and Technical Division of General MacArthur's Occupation Headquarters. This book chronicles their story and provides a full answer to the big question: Did the Japanese have or were near to having an atomic bomb? Apart from their immediate task of reviewing the status of Japan's science and technology at the beginning of the Occupation, the Scientific and Technical Division set about encouraging the formation of new national bodies for science and technology and persuaded the Japanese government to create new and more efficient means of dealing with technological matters, including industrial matters, quality control, patents and other intellectual property, and rendered aid in many other ways to Japan's engineers and scientists.

OCUP 2 CERTIFICATION GUIDE Michael Jesse Chonoles 2017-08-24 OCUP 2 Certification Guide: Preparing for the OMG Certified UML 2.5 Professional 2 Foundation Exam both teaches UML® 2.5 and prepares candidates to become certified. UML® (Unified Modeling Language) is the most popular graphical language used by software analysts, designers, and developers to model, visualize, communicate, test, and document systems under development. UML® 2.5 has recently been released, and with it a new certification program for practitioners to enhance their current or future career opportunities. There are three exam levels: Foundation, Intermediate, and Advanced. The exam covered in this book, Foundation, is a prerequisite for the higher levels. Author Michael Jesse Chonoles is a lead participant in the current OCUP 2 program—not only in writing and reviewing all the questions, but also in designing the goals of the program. This book distills his experience in modeling, mentoring, and training. Because UML® is a sophisticated language, with 13 diagram types, capable of modeling any type of modern software system, it takes users some time to become proficient. This effective resource will explain the material in the Foundation exam and includes many practice questions for the candidate, including sample problems similar to those found in the exam, and detailed explanations of why correct answers are correct and why wrong answers are wrong. Written to prepare candidates for the OCUP 2 Foundation

JAPANESE WAR CRIMES AND RELATED TOPICS: A GUIDE TO RECORDS AT THE NATIONAL ARCHIVES This finding aid will help researchers interested in Japanese war crimes, war criminals, and war crimes trials to navigate the vast holdings of the U.S. National Archives and Records Administration at College Park (NARA). It will also be useful to anyone interested in military, intelligence, political, diplomatic, economic, financial, social, and cultural activities in the Far East during 1931-1951, as well as to those searching for information regarding Allied prisoners of war; the organization, functions, and activities of American and Allied agencies; and the Japanese occupation of countries and the American occupation of Japan. While not aimed at researchers interested in the strategic and tactical military and naval history of the war in the Far East, this finding aid may nevertheless be useful to those with such interests, if only to identify record groups and series of records that may bear on those topics. This finding aid covers records from over twenty record groups and includes materials declassified under the Japanese Imperial Government Disclosure Act of 2000 (P.L. 106-567) as well as records that were never classified and those declassified before the passage of the Disclosure Act. Because the process of identifying, declassifying, accessioning, and processing of records under the Act is taking place as this finding is being compiled, late arriving records may not be identified in this finding aid. Researchers should consult the IWG Web site (<http://www.archives.gov/iwg/>) for a complete and up-to-date list of records declassified under the Japanese Imperial Government Disclosure Act. Federal agencies involved in the identification and declassification of relevant classified records ascertained that there were relatively few pertinent records that were still classified. Most relevant records were either never classified or were declassified decades before the Act and were already in NARA's custody. While this finding aid's coverage is broad, it is not comprehensive. Researchers may find other relevant series of records within the record groups mentioned or not mentioned. Researchers are encouraged to use other finding aids and consult with NARA staff to locate records of interest. In addition, the National Archives at College Park holds non-textual records (such as still photographs and motion pictures) that researchers may want to examine. Other NARA facilities hold many records and donated material related to World War II, including records related to the subjects covered in this finding aid. This is particularly true of the Franklin D. Roosevelt, the Harry S. Truman, and the Dwight D. Think of archives as vast mountain ranges of records with the archivists guiding the expeditions. Explorations on familiar, well-trodden paths produce new perspectives when examined with fresh eyes and imagination.

WOMEN'S EMPLOYMENT IN JAPAN KAYE BROADBENT 2003 The low status accorded to part-time workers in Japan has resulted in huge inequalities in the workplace. This book examines the problem in-depth using case-study investigations in Japanese workplaces, and reveals the extent of the inequality. It shows how many part-time workers, most of whom are women, are concentrated in low paid, low skilled, poorly unionised service sector jobs. Part-time workers in Japan work hours equivalent to, or greater than, full-time workers, but receive lower financial and welfare benefits than their full-time colleagues. Overall, the book demonstrates that the way part-time work is constructed in Japan reinforces and institutionalises the sexual division of labour.

FOREIGN MIGRANTS IN CONTEMPORARY JAPAN HIROSHI KOMAI 2001 Komai (sociology, Institute of Social Sciences, U. of Tsukuba, Japan) draws on recent research to review the contemporary situation of foreign migrants in Japan and to set forth policy recommendations. First published in 1999 by Akashi Shoten, Tokyo. Distributed by ISBS. c. Book News Inc. **JAPAN AS -ANYTHING BUT- NUMBER ONE** Jon Woronoff 1991 Is Japan No. 1? Well, maybe it is if you only consider those sectors where it is particularly successful. But not if you add many others where its performance is mediocre or worse. Is Japan No. 1? Well, maybe it is if you ask the foreign "friends" who have made a career (and sometimes a fortune) as apologists of Japanese causes. But, if you ask the Japanese themselves, you will find that they are anything but satisfied. Is Japan No. 1? Well, maybe it is if you are taken in by the tatemae, i.e. the official version or how its admirers like to picture it. But it does not look so great once you perceive the honne, i.e. the realities of life in Japan. Is Japan No. 1? Well, maybe it is if you take what is best in Japan and contrast it to what is less good in foreign countries. But it does not compare so well if you mix the good with the bad in both places. No, the author does not think that Japan is a horrible place or that its leaders have made a complete mess of things. But, if you look closely, it is certainly not the extraordinary success it is frequently claimed to be. It is closer to the mean, with many serious problems that will only get worse if people foolishly assume it is No. 1.
