The Effects of Low Dose Radiation Elena Burlakova 2004-08-31 The papers collected in this book show the results of investigations performed by Russian scientists in the field of low dose irradiation action. It is confirmed that low doses do have effects on the human organism and the environment and that the most serious consequences are observed in the far post-irradiation period. This branch of radiobiology, which developed after the Chernobyl accident and studied its consequences, is discussed in detail. The main part of reviews and articles is devoted to the aspects of low dose effects on the human and animal genome and far post-irradiation consequences. New details of mechanisms of low dose action are shown and methods of their determination are discussed. Furthermore, the adaptive response of organisms and the low dose effects on the immune system are demonstrated. Also, the difference between protection mechanisms against low dose irradiation and against high dose irradiation is shown and proved.

The Witcher - Het Seizoen van Stormen Andrzej Sapkowski 2017-06-28 De proloog van Andrzej Sapkowski's befaamde serie met heksers Geralt in de hoofdrol. Dé inspiratiebron voor de rol van Henry Cavill uit Netflix-hitserie The Witcher. Het Seizoen van Stormen is het achtste boek van Andrzej Sapkowski over de avonturen van heksers Geralt. Het is los te lezen en speelt zich af tussen de korte verhalen uit De Laatste Wens en Het Zwaard der Voorzienigheid. Hekser Geralt: de man die gewone mensen moet beschermen tegen magische monsters. De man die zijn leven keer op keer op het spel zet om zijn geliefden te redden én goud te verdienen. Om dat te doen maakt Geralt gebruik van zijn eigen magie, van toverdrankjes, en van de trots van elke heksers, zijn twee zwaarden. Een van staal, een van zilver. Maar wat als Geralt zijn zwaarden verliest? Niet alleen zijn ze ongelooflijk kostbaar, maar het is ook een schande om ze te verliezen. Geralt moet ze dus terugkrijgen, en wel zo snel mogelijk... Andrzej Sapkowski keert terug naar zijn populaire held met een losstaand verhaal waarin Geralt vecht, reist en weer liefheeft, Ranonkel zingt en zich in de problemen werkt, tovenaressen snode plannen bedenken, en waarin over de hele wereld donkere wolken zich verzamelen – het seizoen van stormen komt eraan...

Het boek van Toth Henry Neff 2009-09-20 Onder de hoede en leiding van Cooper, de dodelijkste van Rowans agenten, beginnen Max McDaniels en David Menlo aan een zoektocht naar het Boek van Thoth. Het moet uit handen blijven van de demon Astaroth, die anders zijn geheimen met gruwelijke gevolgen zou ontrafelen. Nu Astaroth na eeuwen van gevangenschap weer vrij is, is de wereld buiten de poorten van Rowan toch al vijandig: schimmige wezens krassen aan ramen, sluimerende rivaliteit wordt nieuw leven ingeblazen, en de ene regering na de andere komt ten val. Ver van huis, gevangen achter vijandelijke linies, trekken Max en zijn medestanders Europa door, dalen af in de legendarische Frankfurter Werkplaats, banen zich onverschrokken een weg door de warrige uithoeken van het Zwarte Woud, en verdwijnen achter de sluiers van onze wereld.

De derde industriële revolutie Jeremy Rifkin 2013-08-28 Naar een transformatie van economie en samenleving De economie van de twintigste eeuw, mogelijk gemaakt door olie en andere fossiele brandstoffen, lijkt in een eindfase gekomen. Met wellicht een nieuwe wereldwijde crisis in het vooruitzicht zijn we wanhopig op zoek naar een duurzaam economisch model. Rifkin laat zien hoe internettechnologie en groene energie voor een derde industriële revolutie kunnen zorgen. De auteur schetst het beeld van honderden miljoenen mensen die in huizen, kantoren en fabrieken hun eigen zonne-, wind- en geothermische energie produceren en die energie met elkaar delen via een `energie-internet zoals we nu via internet informatie creëren en met elkaar delen. `Zijn creatieve denken is van grote inspiratieve betekenis voor zowel beleidsmakers als gewone burgers. José Manuel Barroso, voorzitter van de Europese Commissie `Jeremy Rifkin laat helder zien hoe groene energie en distributie ervan via het internet van grote invloed zal zijn op de samenleving en het milieu. Partial Differential Equations Todor V. Gramchev 2000-02-22 The applications of methods from microlocal analysis for PDE have been a fast developing area during the last years. The authors, both are well known in the community, publish for the first time some of their research results in a summarized form. The essential point of the approach is the use of the various types of approximate (asymptotic) solutions in the study of differential equations in the smooth and the Gevrey spaces. In this volume, the authors deal with the following themes: Microlocal properties of pseudodifferential operators with multiple characteristics of involutive type in the framework of the Sobolev spaces; Abstract schemes for constructing approximate solutions to linear partial differential equations with characteristics of constant

multiplicity m greater than or equal 2 in the framework of Gevrey spaces; Local solvability, hypoellipticity and singular solutions in Gevrey spaces; Global Gevrey solvability on the torus for linear partial differential equations; Applications of asymptotic methods for local (non)solvability for quasihomogeneous operators; Applications of Airy asymptotic solutions to degenerate oblique derivative problems for second order strictly hyperbolic equations; Approximate Gevrey normal forms of analytic involutions and analytic glancing hypersurfaces with applications for effective stability estimates for billiard ball maps.

Digitale fotografie voor Dummies Julie Adair King 2009 Dit boek richt zich met name op de meer serieuze hobby-fotograaf. Het eerste deel laat zien wat er belangrijk is bij de keuze voor een veelzijdige camera, deel twee bespreekt de technieken voor het maken van de perfecte foto. Hierbij is aandacht voor digitale aspecten als pixels en bestandsformaten, maar meer nog voor de foto-techniek van alle tijden: het gebruik van f-stops, sluitertijden, belichting en scherptediepte en het maken van goede portret-, landschaps- en actie-foto's. Deel drie behandelt de computerkant: foto's digitaal archiveren, nabewerken, afdrukken of op het web publiceren. Het afsluitende deel van de tientallen geeft tips voor nog betere digitale foto's, informatiebronnen op internet en onderhoudstips voor de camera. **What is a Man?** Natalie Kampen 2002 What Is a Man? enriches our understanding of the paradigm shift produced by feminist theory, that gender is constructed, not "natural," and is political. Indeed, Kampen's essay explores new ground, for as she points out, "few scholars until very recently have written about the way that gender as a category illuminates our understanding of manhood, and fewer still are the archaeologists and art historians who have studied masculinity in late antiquity."

The Metaphysics of Sabzavāri Hādī ibn Mahdī Sabzavāri 1977 Translation of the section on metaphysics in Sabzavari's "Sharh al-manzumah fi al-hikmah," a commentary on his poem "Ghurar al-fara'id," both originally written in Arabic.

The Star Beast Robert A. Heinlein 1977 "LummoX had been the Stuart family pet for years. Though far from cuddly and rather large, it had always been obedient and docile. Except, that is, for the time it had eaten the secondhand Buick ... But now, all of a sudden and without explanation, LummoX had begun chomping down on a variety of things--not least, a very mean dog and a cage of virtually indestructible steel. Incredible!"--Back cover.

Pagan City and Christian Capital John R. Curran 2000 The critical century between the arrival of Constantine and the advance of Alaric in the early fifth century witnessed dramatic changes in the city of Rome. In this book Dr. Curran has broken away from the usual notions of religious conflict between Christians and pagans, to focus on a number of approaches to the Christianization of Rome. He surveys the laws and political considerations which governed the building policy of Constantine and his successors, the effect of papal building and commemorative constructions on Roman topography, the continuing ambivalence of the Roman festal calendar, and the conflict between Christians over asceticism and "real" Christianity. Thus using analytical, literary, and legal evidence Dr Curran explains the way in which the landscape, civic life, and moral values of Rome were transformed by complex and sometimes paradoxical forces, laying the foundation for the capital of medieval Christendom. Through a study of Rome as a city Dr Curran explores the rise of Christianity and the decline of paganism in the later Roman empire.

Sky Blaise Cendrars 1992 "In France, Blaise Cendrars (1887-1961), a friend of Chagall, Leger, Braque, Picabia, and Modigliani, has emerged as one of the great figures of modernism. Together with Apollinaire, he brought cubism to French poetry. Anais Nin hailed him as "one of France's best writers," and the Village Voice called him "the Indiana Jones of French literature."" "Translated into English for the first time, Sky, the last of Cendrars's four autobiographical volumes, weaves together a dazzling collage of prose poetry, travel writing, reportage, detective story, and personal memoir. "His life itself reads like the Arabian Nights Entertainment," writes Henry Miller. In Sky Cendrars recounts his adventures in Russia during the revolution of 1905, in the trenches of World War I (where he lost his right arm), in Brazil in the 1920s, and behind the lines during World War II. The two wars run throughout as a unifying thread." "As the title announces, this is a memoir of the sky - of Cendrars's love of birds, levitation, and aviation. The opening of the book finds Cendrars, the great adventurer and traveler, sailing back from Brazil to Paris with 250 multi-colored birds, hoping to bring at least one of them alive to a child he loves. The second part moves back and forth between the author's recollections of life as a war correspondent in 1940 and an encyclopedic discourse on levitation he wrote in search of a patron saint of aviation (perhaps as compensation for the death of his young son, Remy, who was a pilot during the war)." "With unmatched exuberance, Cendrars writes on poetry, myths, existentialism, his life in Paris between the wars with the painter Delaunay and the Dadaists, and his exotic adventures in Brazil. His anecdotes of Russia, where he was a jeweler's assistant, are compelling and funny. His fiercely imaginative stories, such as one about a Brazilian coffee plantation owner who, obsessed with his love for Sarah Bernhardt, retreats into the wilderness, are magical. Descriptions of birds, stars, and countryside are sheer poetry. For good reason, Henry Miller writes how Cendrars has knocked me cold."--BOOK JACKET.Title Summary field provided by Blackwell North America,

Modern Skeletons in Postmodern Closets James J. Sosnoski 1995 Modern Skeletons takes us on a lively trip from the New Criticism to cyberspace. For James Sosnoski literary criticism is always a reading of cultures and becomes indeed a form of culture building: critics as storytellers, not as scientists.

The Matter of the North Torfi H. Tulinius 2002 This study evaluates the role of legendary sagas in the lives of Icelanders from the twelfth and thirteenth centuries. It looks at the legendary sagas from the perspective of fictional prose narrative, and sheds light on the origin and nature of other genres that arose in Iceland, especially the Icelandic family saga *Islendingasaga*. The author wishes to point out the richness and complexity of these long-neglected sagas. Even though they were probably composed for amusement and recreation, they deserve to be taken seriously as works of the intellect.

World War Z Max Brooks 2013-06-04 Een paar jaar na de laatste wereldoorlog krijgt een medewerker van de Verenigde Naties de opdracht om de geschiedenis van die oorlog, World War Z, op schrift te stellen. Hij spreekt slachtoffers uit tientallen landen, die hem vertellen over de verschrikkingen die ze hebben meegemaakt. Het verhaal begint in China, als een jongetje een geheimzinnige infectie oploopt en verandert in een zombie. Het is het begin van een gruwelijke pandemie die zich door illegale orgaanhandel razendsnel verspreidt over de hele wereld. World War Z is meer dan een post-apocalyptische thriller van formaat: het laat zich lezen als een vlijmscherp commentaar op falende politici, corrupte bedrijven en bekrompen fundamentalisten.

Diocletian and the Tetrarchy Roger Rees 2004 This book aims to make accessible the sources and controversies concerning a key period in the history of the Roman Empire - the reign of Diocletian and its immediate aftermath. Diocletian was an emperor of unusual ambition, and his reign saw considerable military success, an experiment in collegiate government, a move towards provincial capitals away from Rome, a reorganisation of the administrative machinery of empire and its finances, and a committed project to persecute the Christians. In Part I, an introduction to Diocletian and the world of the late third century is followed by six thematic chapters covering a range of aspects of government and society under this emperor, including military, economic, religious and administrative affairs. These chapters discuss the original sources, highlight their strengths and weaknesses, and consider the main scholarly approaches to them. Throughout Part I there are regular cross references to the source material which is presented in Part II - this includes literary, archaeological, artistic, legal, and documentary evidence, as well as coins and inscriptions. All texts are in English, and there is a guide to further reading, a full bibliography, some questions for consideration, a glossary of technical terms, and a brief list of relevant online resources.

De Noordzeemoorden 2 IJskoud Isa Maron 2014-12-06 Op een koude novemberdag worden de doorgewinterde rechercheur Maud Mertens en de jonge Kyra Slagter weer samengebracht door een mysterieuze zaak. Twee jonge kinderen verdwijnen op bijna hetzelfde moment. Hoewel de politie met man en macht onderzoek doet, kan dat niet voorkomen dat er de volgende dagen meer kinderen ontvoerd worden. Er is geen enkele connectie tussen de verdwijningen: ze vinden overal in West-Nederland plaats, de kinderen zijn tussen de acht en twaalf jaar oud en er wordt geen losgeld geëist. Diverse Amber Alerts leveren niets op. Hoe meer kinderen verdwijnen, hoe groter de onrust in het land wordt. Voor Mertens vormen de verdwijningen een onwelkome herinnering aan een oude zaak waarin een jong meisje slachtoffer werd. Toch maakt dit juist dat ze verbeten achter de ontvoerders aan gaat. Kyra weet wat het is als een familielid wordt weggerukt en je vol vragen achterblijft: ontvoerd, vermist, vermoord? De zaak spoort haar nog meer aan haar eigen vermiste zus te vinden: vier jaar geleden verdween Sarina, zonder spoor of bericht. Tot Kyra ineens een briefkaart van Sarina ontvangt. IJskoud is het tweede deel in de spannende serie De Noordzeemoorden! 'Een mooie mix van gruwel en Hollandse "gewoonheid", onberispelijk en met veel vaart geschreven.' Shades of Sexuality Amanda Leamon 1997 Shades of Sexuality: Colors and Sexual Identity in the Novels of Blaise Cendrars, by Amanda Leamon, is currently one of the few studies on the modernist poet and novelist Blaise Cendrars to be written in English. Of interest to scholars of Cendrars, Modernism, Twentieth Century French Literature and early Twentieth Century Art and Humanities, Shades of Sexuality is unique among the growing body of criticism and analysis of Cendrars' fiction in that it explores the ways in which Cendrars makes use of the spectrum of fragmented colors and other elements of disguise and *trompe-l'oeil*, both as an artistic device in the construction of the fictional text,

and as a recurrent motif in the representation and exploration of the male subject and his relation to woman. The author demonstrates how Cendrars effects intersections of gender in the text through the manipulation of colors and their associations with femininity, ultimately undermining the illusory façade of male autonomy which dominates his fictional corpus.

World War II and the Scramble for Labour in Colonial Zimbabwe, 1939-1948 David Johnson 2000 World War II has long been acknowledged as a watershed in modern history of Africa, yet there are few books that examine the years of the war in a particular African country. This book helps to fill this gap by analysing the wartime mobilisation of settlers, soldiers and labourers in colonial Zimbabwe. It examines the sacrifices demanded of ten of thousands of Africans who were coerced into settler production as their contribution to the British war effort. Africans did not remain passive in the face of this onslaught, and the book also addresses their efforts to make their own history, especially on relation to the post-war rebellions of 1945 and 1948.

The Via Latina Catacomb William Tronzo 1986 During the building of an apartment house on the Via Latina in Rome in 1955 a small Christian catacomb was brought to light, a chance archaeological discovery that turned out to be a startling revelation. The architectural form and painted decoration of the catacomb were much remarked--not only were they exceptionally lavish, they also proved exceedingly difficult to fit into the traditional picture of the development of Christian art in late antique Rome. The Via Latina Catacomb: Imitation and Discontinuity in Fourth-Century Roman Painting is the first in-depth study of the monument in terms of its structure and function. A single question that arises from the monument itself serves to focus the discussion: Why was the last chamber in the catacomb made as a copy of one of the first? But the question is also one that demands a comprehensive approach. Thus the catacomb is examined with regard to its construction, plan, and architectural form, as well as its style of painting and imagery.

Sound and Vision Jon Burlingame 2000 A reference to motion picture soundtracks. It discusses the rich history of soundtracks, from composed film scores to movie musicals and song compilations. Divided into three parts, the book begins with an essay detailing the history of the field from its beginnings to the complex international business it has become, then offers an overview of many of the composers who have written music for movies over the years, each with a brief biographical sketch and a discussion of their best work as made available on on-going playing records or compact discs, and finally looks at movie musicals and song compilation scores that have been issued over the years. A comprehensive bibliography is also included.
