Life Cycle Analysis and Assessment in Civil

Engineering: Towards an Integrated Vision Robby

Caspee 2018-10-31 This volume contains the

papers presented at IALCCE2018, the Sixth

International Symposium on Life-Cycle Civil

Engineering (IALCCE2018), held in Ghent,

Belgium, October 28-31, 2018. It consists of a

book of extended abstracts and a USB device with full papers including the Fazlur R. Khan lecture, 8 keynote lectures, and 390 technical papers from all over the world. Contributions relate to design, inspection, assessment, maintenance or optimization in the framework of life-cycle analysis of civil engineering structures and infrastructure systems. Life-cycle aspects that are developed and discussed range from structural safety and durability to sustainability, serviceability, robustness and resilience.

Applications relate to buildings, bridges and viaducts, highways and runways, tunnels and

underground structures, off-shore and marine structures, dams and hydraulic structures, prefabricated design, infrastructure systems, etc. During the IALCCE2018 conference a particular focus is put on the cross-fertilization between different sub-areas of expertise and the development of an overall vision for life-cycle analysis in civil engineering. The aim of the editors is to provide a valuable source of cutting edge information for anyone interested in life-cycle analysis and assessment in civil engineering, including researchers, practising engineers, consultants, contractors, decision

makers and representatives from local authorities.

Teaching Mathematics Creatively Linda Pound

2015-04-24 This new and updated edition of

Teaching Mathematics Creatively offers a range

of strategies to enable trainee and practising

teachers to take an innovative, playful and

creative approach to maths teaching. It promotes

creativity as a key element of practice and offers

ideas to involve your students and develop

knowledge, understanding and enjoyment.

Exploring fresh approaches, this text explains the role of play in bringing mathematics alive for children and teachers alike. It identifies the power of story-telling in supporting mathematical thinking, examines cross-curricular teaching, and allows you to plan for teaching creatively.

Imaginative ideas, underpinned by the latest research and theory, include: Learning maths outdoors - make more noise, make more mess or work on a larger scale Everyday maths - making sense of the numbers, patterns, shapes and measures children see around them Music and

maths – the role of rhythm in learning, and music and pattern in maths Giant maths - how much food do you include on a giant shopping list?

Stimulating and accessible, with contemporary and cutting-edge practice at the forefront, Teaching Mathematics Creatively includes a wealth of innovative ideas to enthuse teachers and enrich maths teaching. This book is an essential purchase for any professional who wishes to embed creative approaches to teaching in their classroom.

Undergraduate Education for Public Health in the United States Cheryl Lynn Addy 2015-07-03

Undergraduate programs in public health are growing rapidly. At colleges and universities throughout the United States, both the number of programs and the number of students have expanded greatly in the past decade. In response to this trend, the Council for Education of Public Health (CEPH) has begun to accredit undergraduate public health programs, with the first programs approved in 2014. Around the country programs exhibit wide variation, from concentrations in liberal arts colleges to pre-

clinical foundations at doctorate-granting universities to undergraduate programs in accredited schools of public health. Faculty, both new and seasoned, are fully aware of the need to integrate undergraduate education in public health with graduate education—but the roadmaps of exactly how to do so are still nascent. The purpose of this Research Topic is to gather articles describing this variation, with the intent that the collective body of work will facilitate analysis and discussion of what makes a quality education and builds a competent workforce.
